

CruiserDesk

by CopBuilt · Built for cops, by a cop

Stop typing **the same thing twice.**

A Windows app that takes arrest information one time, fills it into every form the officer selects, and builds ready-to-go PDF packets for the prosecutor and for internal review. Less repeat paperwork. More time on patrol.

Arrest Packet is in development

Today: form by form

- Name, DOB, height, weight, address, typed again on every form
- One typo can get the packet kicked back
- Print, sort and assemble the packet by hand

CruiserDesk: one entry, every form

- Enter the arrest details once on simple, guided screens
- Every form in the packet pulls from that one entry
- Review on one screen, then get each packet as its own PDF

Four steps. No expensive training.

1

Select your forms

Prosecutor forms plus any internal review forms this arrest needs.

2

Enter it once

Plain-language screens for the suspect, incident and charges.

3

Review

Fix a detail once and it's fixed on every form.

4

Get your packets

A prosecutor PDF and a separate internal packet, ready to submit.

Built for the road

- Installs like any Windows program; no servers to set up
- A lost connection never stops a packet
- Big buttons, plain labels, one step at a time
- Autosaves, so a call for service never costs your work

Your forms, built to grow

- Works with your agency's own prosecutor and internal forms
- Add or update forms anytime with tag import
- Ready-made forms from the CruiserDesk form library
- Planned add-ons: Use of Force, Vehicle Pursuit, Criminal Intel

Case details stay on the officer's computer.

Designed from day one with CJIS security in mind. Narratives, names and everything an officer types stay on that computer, encrypted.

- Only blank forms, licenses and a bare-bones audit trail go through our secure portal
- The audit trail carries only the case number and defendant initials
- Finished PDFs are deleted from the computer after 7 days by default

See it on your own forms.

Ask about your county's prosecutor forms, a demo, or licensing.
