

Duty Line HQ
by CopBuilt · Built for cops, by a cop

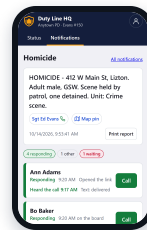

Notify your whole department in seconds.

A complete department notification system, with detective on-call scheduling and duty-line routing built in. One app on every officer's phone. Nothing to install, no server to run.

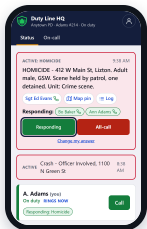

Call out any unit

- **Templates** for notifications; **groups** for features
- Each phone **rings and reads it out**, then texts a private link to the **DLHQ app**
- Address lookup with a **map pin**; no case details in texts

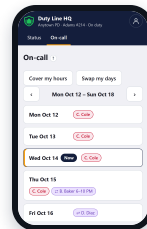

See who's coming, live

- Who **heard the call**, opened the link, and is responding
- **Auto follow-up**: re-calls at 2½ min, backups at 5
- Printable incident report with map and timeline

Detective duty line & routing

- One number **anyone in the department** can call to reach the detective who's up
- Rings **on duty** → **on call** → **backups**, round and round
- **Press 1 to take it**, so voicemail never grabs a call
- Missed-call and incoming-text alerts to whoever's up

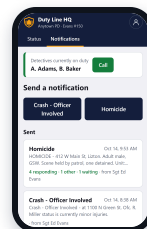

Detective on-call schedule

- Week view set by your schedule admins
- Detectives **swap nights or cover hours** themselves, all logged
- 4 PM logoff, morning hold-over, weekend and holiday handoffs
- Text alert 72 hours before any gap

Team activations (SWAT & more)

- Every member gets a call: **press 1** responding, **2** not
- One text with the address and a map link; reply 1 or 2
- Re-called every 2½ min; **no app needed** for outside agencies
- Live board: green, red, black

Built for supervisors

- One tap calls the detectives **on duty** (green) or **on call** (red)
- Live Status board, and **All-call** for big scenes
- Groups control who sees what; templates control who's notified

Secure, reliable and on the record

- Login by **texted code**: no passwords to share or reset
- Details, texts and comments **encrypted** (AES-256)
- Every call, answer and change **logged**; CSV export for court
- Nightly backups plus 30 days of history
- Daily self-test and 5-minute health checks
- Fallback rings the backups if the app is ever unreachable

Replaces: Non-secure lines Call forwarding Group texts & paging apps Paper & spreadsheet schedules

Includes: manuals for detectives, supervisors and admins

See it on your own phone.

Up and running in an afternoon. No server, no IT work.
